

Program in Emergency Department Leadership and Administration

The Program in Emergency Department Leadership and Administration (PEDLA) is tailored for international healthcare professionals and leaders who seek to enhance their clinical leadership and operational management skills, essential for leading high-performing emergency departments that deliver high-quality care effectively.

Program Goals

- Foster a mindset of innovation to explore and implement new technologies and methodologies that improve healthcare delivery.
- Cultivate skills to lead and manage organizational change, fostering resilience and adaptability of staff and processes.
- Gain a comprehensive understanding of healthcare finance, including budgeting, cost management, and revenue cycle optimization.
- Gain skills in quality improvement methodologies to enhance service delivery and patient safety.
- Gain expertise in creating and implementing strategic plans that align with organizational goals and address community health needs.
- Develop strategic thinking and decision-making abilities to lead teams effectively in a complex healthcare environment.
- Identify and implement best practices to enhance patient care quality, safety, and satisfaction.
- Develop/build experience in communicating with hospital leadership to advance departmental and organizational objectives.
